Sterility (PCR)	No Growth	No Growth	PASS

💧 Endotoxin Testing — USP <85>

Test	Specification	Result	Status
Endotoxin (USP <85>)	Report Result	≤ 0.05 EU/mL	Reported

About this result: Endotoxin is reported as a quantitative value. Acceptable limits vary by product type and matrix, so no universal pass/fail threshold applies to RUO products. This result is below commonly referenced endotoxin thresholds.

HPLC Chromatogram

NOTES & METHODOLOGY

Sample confirmed to be GHK-Cu by HPLC. Identification by chromatographic retention time comparison with a reference standard.

Elemental impurities analyzed by ICP-MS per USP <233>.

Bacterial endotoxin testing performed by Limulus Amebocyte Lysate (LAL) method per USP <85>.

Sterility testing performed by PCR (Polymerase Chain Reaction) method.

Peptide purity determined by RP-HPLC area normalization at 214 nm. Value represents the percentage of the target peptide relative to all peptide-related peaks. Non-peptide process-related impurities, if detected, are excluded from the calculation.
